NETYS RT

Single-phase UPS rack/tower
from 1 to 10 kVA

gamme_919.psd

The solution for

> Data centre
> Healthcare Facilities
> Infrastructure & Transport
> Industry
> Buildings

Strong points

> Best-in-class design
> Optimum battery management
> Up to 5-year warranty
> Simple installation whithin any operating environment
> Ease of use
> IoT and cybersecurity

Compliance with standards

> IEC 62040-1
> IEC 62040-2
> IEC 62040-3 *(efficiency tested)*
> AS 62040.1.1
> AS 62040.1.2
> AS 62040.2
> RCM (E2376)

Certifications and attestations

Function

NETYS RT is the fourth generation of single-phase rack-tower UPS, ensuring the protection and availability of IT infrastructure that meets the demands of both power reliability and installation flexibility.

Advantages

Best-in-class design

- True online double conversion technology with sinusoidal waveform; completely filters out all disturbances from / to the mains power supply and ensures maximum protection of the utility.
- Wide tolerance of the input voltage reduces switchovers to battery mode, prolonging battery life.
- Potential for N+1 parallel and redundant configuration to maximise the availability of critical utilities (up to 30 kVA).
- Li-ion battery option for greater compactness and reduced maintenance.
- Robust coated versions for highly demanding applications.
- Performance tested and verified by third party independent laboratory.
- Wide operating ambient temperature up to 45°C.

Up to 5-year warranty

- Lead-acid battery: 2-year UPS warranty, with the option of a 3-year extension.
- Lithium-ion battery: 3-year UPS warranty with the option of a 2-year extension. The battery is also covered by the warranty if the UPS is connected to Socomec's cloud.
- In the event of failure, a replacement product will be sent to site within 48 hours (Europe). You will have 1 month to return the faulty product to Socomec.

Ease of use

- Multi-language LCD display.
- Large LED status bar.
- Load segmentation function to prioritise loads and manage critical situations.

- Wide range of communication protocols for integration into LAN networks or Building Management Systems.

Optimum battery management

- Lead-acid and Li-ion battery technology management.
- Hot-swap modular battery extension (EBM) to meet all back-up time requirements - even after installation.
- Battery ageing detection function.
- Fast recharge – even for very long back-up time.

IoT and cybersecurity

- Potential to add Net Vision network card for a direct and secure connection between the UPS and the Ethernet network, and for access to a full panel of digital services such as the SoLive remote monitoring app.
- Conformance to the cybersecurity guidelines of ISO/IEC 62443-4-2 standard.
- Cybersecurity test certified by a third party company.

Simple installation within any operating environment

- Quick and simple installation: no configuration necessary on first start up, avoiding risk of human error.
- Full set of accessories for easy and safe installation.
- Easy switch from rack to tower mode will suit most environments - even with limited space and specific needs.
- Compact footprint in tower mode.
- High density module saving valuable cabinet rack space.

socomec
Innovative Power Solutions

General characteristics

- Rack/Tower convertible.
- Embedded dry-contact interface.
- Input/Output cables (1000-3000 VA).
- Rail kit and rack ears.
- USB cable.
- Tower stands.
- Cable lockers.
- Connection for battery extension modules.
- Port for parallel operation (5000 - 10000 VA).
- Internal temperature sensor.
- Power off the UPS remotely.
- Cold start.
- Auto and Manual battery test.

Electrical options

- UPS models with tropicalised (Conformal Coating) boards.
- Hot-swap battery extension modules.
- External Manual By-pass.
- Longer battery cable, 1 side free for special cabinets.

Standard communication features

- 1 slot for communication options.
- USB port for UPS management.
- MODBUS RTU (RS232).
- RS485 for Li-ion Offer (BMS).
- LOCAL VIEW software for local UPS monitoring and shutdown for Windows, Linux and MAC Osx.

Communication options

- Dry-contact card.
- NET VISION Card or NET VISION Box: professional WEB/SNMP, ethernet interface for UPS monitoring and remote automatic shutdown (MODBUS TCP).
- Environmental Monitoring Device (EMD).
- REMOTE VIEW PRO supervision software.

Remote monitoring and cloud services

- SoLive UPS: free mobile app enabling UPS systems to be monitored from a smartphone, anywhere, anytime.

Innovative Power Solutions

NETYS RT - Li-Ion battery UPS

The Li-Ion Battery solution, available for NETYS RT 1-3 kVA, provides higher back-up power density and much longer battery life than traditional lead-acid batteries. The Li-Ion Battery solution is equipped with an embedded interactive BMS (Battery Monitoring System) that provides accurate and individual cell monitoring and coordinates the recharging profile with the UPS to maximise the back-up power availability.

Compact and lightweight
• Lithium-ion batteries weigh much less than their VRLA counterparts, typically being between 40% and 60% lighter. Thanks to their higher energy density and resulting compactness, they are also easier to install - especially in spaced-constrained environments.

Faster to recharge
• Lithium-ion batteries will recharge in just 4 – 5 hours, while VRLA batteries can take over 12 hours. This enables much quicker recovery after discharge, which is crucial in applications requiring continuous uptime.

Higher resiliency
• Lithium-ion batteries allow up to 10 times more charge/discharge cycles compared to VRLA batteries. They also have a wide operating temperature range without sacrificing performance.
• Lithium-ion UPS with tropicalised boards as a standard.

Longer lifespan
• Lithium-ion batteries have a significantly longer lifespan than VRLA batteries - around 2 or 3 times on average. This means fewer or even zero replacements during the lifetime of the UPS and consequently lower maintenance costs.

Up to 5-year warranty
• Lithium-ion battery: 3-year UPS warranty with the option of a 2-year extension. The battery is also covered by the warranty if the UPS is connected to Socomec's cloud.
• In the event of failure, a replacement product will be sent to site within 48 hours (Europe). You will have 1 month to return the faulty product to Socomec.
